

A vibrant, hand-drawn poster for a STEM Day event. The background is a light pink grid. At the top, there are several icons: a molecular model with orange and blue spheres, a green calculator, a glowing yellow lightbulb, and a green cell with orange organelles. Below these are a yellow paramecium-like microorganism, a blue and orange horseshoe magnet, and a Bohr-style atomic model with a yellow nucleus and blue electrons. A decorative orange border separates the top section from the main text. The main text is in a large, bold, black font, with 'STEM DAY' in a larger, teal, outlined font. Below the title is a teal banner with the date and time. Underneath that is the text 'NOT A DROP OFF EVENT!!'. The bottom section features a white box with a black border containing the event's purpose and name. The bottom of the poster is decorated with a magnifying glass, a blue DNA double helix, a green microscope, a blue cell, and a yellow star-shaped organism. There are also several decorative ribbons and pushpins scattered throughout.

RENAISSANCE MIDDLE STEM DAY

APRIL 22ND @ 6-7:30 PM

NOT A DROP OFF EVENT!!

Discover, innovate, and create
with STEM.
The possibilities are endless!
Help us make this event unforgettable
